## Commercial Gas Engineer

### Background

Cool and Heat Ltd are Heating and ventilation and Air conditioning Contractor, carrying out projects for some of the most prestigious Blue-Chip companies in the country. We are recruiting for an experienced Plumber/Pipefitter to join our existing projects team on a full time, permanent basis. Working within the Cool and Heat projects team provides exciting opportunities to use a wide range of skills each day, in new and challenging environments.

If you desire to be part of a growing company, with a friendly team, where you can continue to develop your skills and build a fulfilling career,

**The Role** We are currently recruiting for is a commercial gas to service and maintain / Install a wide range of commercial gas applications.

### This role will involve

- Carry out repairs / diagnose faults on both on commercial and domestic appliances.
- Carrying out planned maintenance, or reactive diagnosis / repairs to Commercial boilers AHU's heating pumps, water heaters
- Provide effective solutions to the faults found.
- Attend manufactures training courses.
- Use of our computer systems and other required software packages.
- Aim for fix first time on all repairs.
- Provide the highest standard of service or repairs to build on our already excellent relationship with our customers, all with in the gas standards guidelines
- Data input into Protean
- Actively promote the company in the best light.
- Knowledge of heat pumps desired but not essential.
- Participation in our emergency callout service.

**The Person:** The ideal candidate will be a team player with great communication skills and have at least 5 years' trade experience in servicing, repairs, and maintenance (Installation experience not essential but would be an advantage)
